

Delivering temperature-controlled warehouse solutions

Our properties are designed to offer customers optimal flexibility, with high quality warehousing that can be customised to suit your bespoke operational requirements.

Our enhanced specification features the market-leading CA Twin-Therm® Built-Up Roof and Wall system, complete with the advanced CA Twin-Therm® Chronus upgrade.

Delivering a superior building envelope with excellent thermal performance, each property is engineered to offer internal climate control, perfectly suited to meet both 'chill store' and ambient product requirements.

Utilised by our customer HelloFresh, the meal kit company benefits from the system's environmental credentials and the energy savings generated.

Accommodate single chill store or sub-divided multi-temperature areas (suitable for temperatures of 0-2°C, up to 5-8°C)

Minimise heat loss / gains for enhanced thermal performance

Optimal environmental conditions to store a range of products

Maximise storage volume, with no requirement for secondary internal build

Improve energy conservation

Reduce running costs and CO₂ emissions

Superior air tightness of between 1.0 and 2.0m³/hr/m² for improved temperature control

Enhanced EPC rating (A)

Technical specification:

- + Internal temperatures achieved of 0-2°C up to 5-8°C
- + Enhanced air tightness between 1.0 and 2.0m³/hr/m² to achieve 'chill store' requirements
- + The world's first building envelope system to achieve the FM APPROVED certification mark, representing the highest international fire safety standards.
- + Complies with Montreal Protocol and UNEP recommendations relating to insulation choice
