

NUNEATON 230

Delivering temperature-controlled warehouse solutions

Nuneaton 230 is designed to offer our customers optimal flexibility, with high quality warehousing that can be customised to suit your bespoke operational requirements.

The property's enhanced specification features the market-leading CA Twin-Therm® Built-Up Roof and Wall system, complete with the advanced CA Twin-Therm® Chronus upgrade.

Delivering a superior building envelope with excellent thermal performance, Nuneaton 230 is engineered to offer internal climate control, perfectly suited to meet both 'chill store' and ambient product requirements.

Benefits:

Accommodate single chill store or sub-divided multi-temperature areas (suitable for temperatures of 0-2°C, up to 5-8°C)

Optimal environmental conditions to store a range of products

Minimise heat loss / gains for enhanced thermal performance

Superior air tightness for improved temperature control

Reduce running costs and CO² emissions

Enhanced EPC rating

Technical specification:

- + Internal temperatures achieved of 0-2°C up to 5-8°C
- + Enhanced air permeability to achieve 'chill store' requirements
- + Improved energy conservation, with air tightness ratings of between 1.0 and 2.0m³/hr/m²
- + Twin-Therm® Built-Up Roof and Wall system boasts a four-hour integrity firewall
- + Complies with Montreal Protocol and UNEP recommendations relating to insulation choice
